
Trade The News

Posted by aaron - 2007/07/28 10:16

The market reacts so quickly after the news being released. The news takes less than 5 seconds to effect the market.

But I couldn't find a place that deliver that kind of news that you find on the economic calendar instantly or at least to be delivered within 5 seconds.

Could you help me?

Hello,

I had been surfing popular Forex sites like Babypips, Forexboost, forexplane and others and was quite impressed by an article Secret Forex Society, It gives fundamental analysis and the economic news in real time. I found it very informative and useful.

Hope it helps!

Good luck
